eSignature legally binding with U.S. E-SIGN Act

In 2000, the U.S. Electronic Signatures in Global and National Commerce (ESIGN) Act established electronic records and signatures as legally binding, having the same legal effects as traditional paper documents and handwritten signatures. But not all eSignature solutions are created equal.

Documents play a crucial role in business. Sales contracts, new bank accounts, tax documents, loans and rental agreements and more all require documents to complete the transaction. DocuSign accelerates these often manual, paper-based processes by helping companies complete them online from start to finish. Only DocuSign can securely automate workflow, collect information, take payment, and let you sign everything, everywhere so you can transact business faster, reduce costs, and delight customers.

The world's leading eSignature and Digital Transaction Management solution

Established in 2003, DocuSign is the pioneer in electronic signatures and the world's leading digital transaction management solution. With more than 50 million customers, DocuSign serves more individuals, small and medium businesses and U.S. Fortune 1000 companies than any other service provider. Employees at 99 of the U.S. Fortune 100 have used DocuSign to accelerate the speed of business. Why? DocuSign improves business results by managing all aspects of documented business transactions in the cloud, connecting companies of all sizes to their customers, partners, suppliers and employees so they can transact business in confidence.

Faster & easier

No software, hardware or training is required. Conduct business with customers, partners and suppliers anytime, from any Internet-connected device—so it's convenient for everyone.

Complete & extensible

Automate simple agreements or the most complex multi-party transactions. Our open, standards based approach makes it easy to connect to your existing business systems. No more printing, faxing, overnight shipping, or re-keying data.

Trustworthy & secure

Documents are encrypted and stored tamper-proof in the cloud, ensuring integrity during the transaction process and after completion.

- ISO/IEC 27001:2005 Certification
- Track record of 99.99% system availability
- Enterprise class SSAE 16 tested data centers and solution
- Legally binding with court-admissible audit trail
- Multiple signer authentication options
