

# Make hard work easy.

## Meet the Samsung Galaxy Tab S4.

These days, you need a tablet that works well on the go and at home. The powerful Samsung Galaxy Tab S4 has innovative technology that will keep you more productive and secure, wherever you are. And it's all powered by Verizon, America's largest, most reliable 4G LTE network.

### Be more productive.

- The 10.5-inch sAMOLED display delivers the impact of a big screen. Get the greater clarity and color accuracy you need for viewing and sharing important documents and presentations.
- The redesigned precision S Pen is full-size and comfortable enough to draw and take notes on the go, as well as give interactive presentations to clients.
- Use Samsung DeX to attach an external POGO keyboard to the Galaxy Tab S4. You'll virtually get a desktop experience. Open up to 20 windows and expand the screen to an even bigger external monitor using an HDMI dongle.

### Be more secure.

- Samsung Flow lets you share work on the go between the tablet and your Samsung smartphone. You can even check your messages and reply right away on the tablet.
- A 6,000 mAh battery means you can work well into the afternoon, while a USB 3.1 Type C connector speeds up recharging for when you need it. Plus, with the Ultra Power Saving Mode, you can finish more jobs without having to recharge.

**Contact your Verizon Wireless representative to learn more about what the Samsung Galaxy Tab S4 can do for your business.**
